

JOIN CMSNE FOR THEIR 2025 ACUTE HOSPITAL CASE MANAGEMENT CONFERENCE

Enhancing Your Case Management

Contributing to Successful and Sustainable Outcomes in 2025

Virtually Saturday January 25 & February 8, 2025

ABOUT THIS CONFERENCE

Learn use of current tools and emerging best practices to elevate your case management "Superpower!"

A Case Manager's practice is filled with challenges, especially when managing complex patients, from admission to readmissions associated with compromised chronic conditions. These challenges are further impacted by the current regulatory landscapes, ethical, systems, and policy challenges.

National and local speakers will share their expertise to meet your case management learning needs. They will discuss hospital capacity challenges, take you on a journey through the Medicare Maze in 2025, address effective readmission strategies, discuss meeting the complex discharge needs of patients with chronic respiratory failure and hepatic encephalopathy, and finally, provide the evidence-based practice strategies and ethical issues for overturning Medicare Advantage post-acute denials. All these critical lectures prepare you to meet the new year's challenges.
