Aimee D. M. Bailey, MHA, MSN, POPM is a nurse leader and product strategist working at the intersection of AI, clinical & claims data, and healthcare technology. With a master's degree in nursing and healthcare administration and a background in case management, she has held roles in early-stage startups, Fortune 5 healthcare organizations, and emerging health tech companies. As a Certified SAFe ® Product Owner/Product Manager (POPM), Aimee focuses on building data-informed healthcare solutions that enhance operational efficiency, ensure data integrity, and improve patient outcomes. She is passionate about healthcare innovation, clinician involvement in technology development, and advancing the nursing profession. She advocates that AI supports, not replaces, human expertise. Her experience bridges the gap between clinical insight, data strategy, and product development. Aimee is the Founding Principal of AI Care Advisors LLC.
